1 Executive Summary

The following report provides a high level overview of district and school level performance on the SAT assessment. The purpose of the report is to provide stakeholders, leaders, and community members with several points of analysis regarding high school academic performance of Sample Public Schools.

2 Background

The College Board has established “college and career readiness” benchmark for the two sections of the new SAT. Meeting the benchmark means that students are on track for success beyond high school. The target benchmark for Evidence Based Reading and Writing is 480, while the target for Math is 530. The College Board predicts that students who meet these benchmarks would earn a grade of a C or better in a first-semester college course.

3 Understanding the data

There are students that took the SAT 11. These students come from 12 unique schools.
